NATIONAL IRIS GARDENS

HOWARD WEED

THURLOW WEED

BEAVERTON, OREGON

Iris Information

Size of Plants

The rhizome illustrated on the back cover showing ten increases is not unusual. The rhizomes we ship show increases which are a guarantee of bloom the following year, for without increases, a plant will not flower. We send out good-sized rhizomes but do not guarantee any particular size or number of increases, for the various varieties differ greatly in this respect. Our rhizomes, being larger than those grown in other sections, produce a better flower the first year and multiply more rapidly.

Freedom From Disease

The Iris Borer and the Japanese Beetle which infest many of the Eastern states are unknown in Oregon. All rhizomes shipped from our gardens are absolutely clean and free from any disease or pests. State horticultural experts who inspect our gardens have never found a trace of injurious pests or disease.

No Irrigation

We do not irrigate as do some Western growers. Any complaint made of irrigated plants does not refer to us. Our large rhizomes are a result of fine soil, abundant room, frequent transplanting, and our long growing season. Our large rhizomes **DO NOT ROT!**

Prices

Our prices are based on the amount of stock we have of each variety. Although we do not claim to quote the lowest price on each variety, we do claim that our prices considered as a whole are below average.

Descriptions

We do not apologize for our short descriptions. We give the essential characteristics and colors of each variety and the price, which is all that any flower lover needs. The lengthy, glowing descriptions used by other Iris specialists in an attempt to make sales is superfluous and may be applied to one variety as well as another. Our business is to satisfy customers—not to exhaust the dictionary to find alluring, descriptive words. We try to make our descriptions brief and to the point. The letter "S" refers to the standards or upright petals, and the letter "F" refers to the falls or horizontal petals.

Distance We Ship

Many flower lovers have the mistaken impression that Iris rhizomes cannot be shipped long distances. Practically all of our orders are sent by parcel post and are received in as good condition 3000 miles away as 100 miles distant. We have had repeat orders from Australia and South Africa, in each case our customers informing us that the rhizomes arrived in perfect condition. A large percentage of our regular customers are situated in the New England and Atlantic states and we have never had a single complaint regarding the state of shipment upon arrival.

Orders

We prepay all postage on retail orders and ship without delay. We commence shipping immediately after the blooming season. An early order may avoid disappointment as the stock of some varieties is limited. All orders are accepted contingent upon condition and availability of stock at shipping time. No orders filled for less than \$1.00. Cash with order. Remember, our mail address is Beaverton, Oregon.

Catalog

Our catalog is neither the expensive, embossed, heavy papered kind with colored iris pictures untrue to life; nor the cheap, inferior price list as sent out by some growers. You, the customer, pay for the first type by exorbitant charges, and the latter type are indicative of the kind of stock grown. To enable us to sell at our low prices, this catalog is sent only to those who are genuinely interested in the growing of iris. If you have friends or relatives who are interested in Iris, we shall be glad to forward a catalog to them. **SEND IN YOUR ORDER AT ONCE SO THAT WE MAY FORWARD TO YOU OUR BEST STOCK.**

Stock

We send out only true to name stock and gladly correct any error made in shipping. We have one of the largest collections of Iris in the world despite the fact that we have discarded hundreds of inferior varieties and only retain those of recognized merit. This year we are offering to our customers a choice of nearly four hundred bearded varieties, a select list of Spuria, Siberian, and Miscellaneous Irises, a large collection of Regelia, Regelia-cyclus, and Pogo-cyclus hybrids, and the finest collection of correctly named Japanese varieties to be found.

Visitors

We welcome flower lovers at any season, but especially from May 10 to July 20, during the blooming season. We are located six miles west of Portland on the new Canyon Road, acclaimed as the finest highway leading into Portland. Our Portland telephone is BRoadway 6727.

Hardiness

Our rhizomes are absolutely hardy. Our winters are not the mild winters of California and many of the Iris that grow well in that state do not thrive with us. Our Iris, however, grow well in that state. Our occasionally cold snaps strengthens the rhizomes so that no difficulty is encountered when they are transplanted to colder states.

Testimonials

Our testimonials come unsolicited. So many of our customers have expressed their appreciation of our "Oregon-grown" rhizomes that we feel it only proper to print a few at the top of our catalog. We have received hundreds of others of similar tone.

Repeat Orders

The outstanding evidence of satisfied customers is indicated by repeat orders. Many of our regular customers order from us yearly, thus keeping their Iris gardens up-to-date. A few new Iris varieties planted each year add much to the flower lover's joy during the blooming season. We find on examining our records that much of our business is repeat orders. We attribute this to the following reasons: (1) Our rhizomes do not rot; (2) our customers run no danger of importing Iris Borer or other pest or disease; (3) our prices are reasonable; (4) our rhizomes are larger than the average; and (5) we carry only the best.

"My Iris roots were unusually fine and are doing splendidly. I am enclosing a list of flower lovers who desire your catalog."
—Mrs. Eugene H. Price, Hannibal, Mo.

Special Bargains In Iris

Realizing that many who desire a selection of Iris may not have the time or inclination to select the proper varieties from our display gardens or catalog, we give below a number of collections which are truly bargains. They have been selected so as to give the most value for the money. One substitution of a variety of similar price may be made in each collection if desired.

All collections are shipped prepaid.

"The Iris arrived in good condition and were promptly planted. They certainly bear out your claims for "Oregon-Grown" stock, as they were fine looking rhizomes."

—Eugene Beaudry, Whitinsville, Mass.

ORCHID-IRIS

We are designating the varieties listed on the following pages by this descriptive term because they are as beautiful as the finest orchids with the added advantage of being easily grown by all flower lovers. Many people associate the name "Iris" with the term "flags" and these names bring to mind flowers of an inferior grade. The flowers produced by the choice varieties recently originated, as accurately portrayed upon our cover, are as different from the common old-time iris as Man is from the Ape. You cannot grow tropical orchids in your garden, but YOU CAN GROW Orchid-Iris shipped direct from us to you. Make out your order and send it today; don't delay. When planted during June, July, August or September, they will bloom for you next spring.

Tall Bearded Iris

These are the Iris most generally known and by far the most popular. During May and early June they form a riot of color in an iris garden.

Aarehorst.	S, lilac, blended dark olive; F, deep plum violet.....	\$.25

Ember.	A fine rich violet-red self, with brilliant orange beard.....	.35
Enchantment.	S, slaty-lilac and fawn; F, purple-red, tinged with garnet.....	3.50
Endymion.	A soft creamy-yellow, with lilac flush. Much admired.....	.35
Ensorecleur.	White, stippled and striped lilac, giving unique effect.....	.35
Eothen.	Soft, ivory-yellow, entirely overlaid buff; antique ivory effect.....	5.00
Erebian.	Large flowers of gorgeous bordeaux-red. Heavy gold beard.....	5.00
Erin.	S, very light lavender; F, deep blue, white base. Medium size.....	2.00
Etoile du Matin.	Sulphur yellow, the S dotted brown; F, blue.....	.25
Euphemia.	S, cotinga purple; F, prune purple to black. Very tall.....	.75
Euphony.	S, ruffled copper and old gold; F, tinged violet on gold background	.50
Eventide.	A very beautiful and distinctive soft lilac self.....	.35
Evolution.	S, frilled, coppery bronze; F, flaring, of deeper shade. Unusual..	8.00
Farandole.	S, bright rosy-lilac; F, deep rose-purple, edged lighter. Large.....	1.00
Fenton.	One of the older light lavender blue flowers. Yellow beard.....	.25
Firefall.	One of the brightest red Irises grown in our gardens.....	.50
Fire God.	S, red-bronze, tinged lavender; F, brown garnet. Early.....	.60

"You may be interested to know that several dozen iris plants bought from you last year very late in season, despite ten days of freezing weather after the middle of March, were in blossom early in May. Your rhizomes are the largest and best that I have had from any place."

—Mrs. J. B. Hamilton, Knoxville, Tennessee.

MAGNIFICA

"Your Iris arrived and in the seven years that I have been buying Iris, I have never seen larger rhizomes. If these roots are a sample, you have a customer for life."

—Mrs. S. W. Holden, Petersburg, Va.

Fismes.	S, cream, deepening to yellow; F, soft reddish-lavender. Orange beard.	.25
Flamingo.	A light, warm, rosy red, with strong central infusion of yellow....	.50
Flammenschwert.	S, bright golden brown; F, crimson-maroon, edged yellow..	.25
Folkwang.	S, white; F, claret red. An interesting color combination.....	.25
Fra Angelico.	S, light golden bronze; F, deeper, with rich gold beard.....	.25
Frances Gray.	Late flower of orchid color, on strong stems. Fragrant.....	5.00

Imperial Blush.	A fine tall and large blush pink on well-branched stems.....	9.50

*"I am very glad to recommend your rhizomes as the best that I have gotten from anywhere."
—Mrs. Raymond Edwards, San Antonio, Texas.*

OREGON BEAUTY

A rare and beautiful recent introduction.

"The iris you sent me have bloomed. I must mention one especially which produced 13 increases and six bloom stalks ten months from time of planting."

—Joseph Stijskal, Chicago, Illinois.

Impressario.	S, lobelia-violet; F, purple. A beautiful blended bi-color.....	.30
Indian Chief.	F, velvety, deep blood red; S, even light red-violet tone.....	2.00

"The Iris arrived yesterday and I can very truthfully say that the rhizomes are the finest I have ever received. More surprising than the quality was the excellent condition of the root system—there was not the slightest sign of drying. From all appearances these rhizomes might have been sent to me from nearby Virginia rather than from all the way across the continent."

—Charles W. Ayars, Tacoma Park, D. C.

NATIONAL ORIGINATIONS

National Prosperity (National 1933). This is just the iris for which we have been looking around that corner for many a year. It is the only one of the blues which we have saved from the depression years. Why not plant it in your garden and enjoy Prosperity with us. Here is how it appears. S, deep blue, ruffled slightly at edges; F, deep blue, tinged violet, slightly lighter coloring at edges. They are 3 inches wide and 4 inches long, falling straight downward with incurving sides. The blue is accented by a gold beard. Style arms are blue, tinged yellow. S are 3 inches wide and 3½ inches long. 40 inches in height on well branched stems. \$25.00

Blue Velvet's Wonder-Child. (National 1933; Dauntless X Blue Velvet). We are wondering why an iris like this has not been introduced long ago. You will like this precocious youngster in your garden for it will give life to the planting. At first, we thought of giving this variety a long name, but decided to give it a nice short one like the one selected. S, red-violet; F, blue-violet, suffused red, edges lighter. Light gold beard. Brown and white markings at base. Six and more blossoms to a 40-inch well-branched stalk. Style arms yellow, tinged blue. \$25.00.

25c Each

In keeping with our policy of offering the best Iris for the least money, we are offering these fine varieties at this exceptionally low price. Just a few years ago, we sold these plants at prices ranging from \$2 to \$10. When our stock has been completely exhausted, we shall be forced to return any orders received, for we ourselves cannot purchase many of these varieties at wholesale for the price we are offering them to our customers.

Just check varieties desired and tear out sheet. Please include one second choice variety in your order.

"Thanks for the fine Iris sent. I noticed when I received your catalog that your prices were very reasonable as compared with our California growers." —Mrs. Louise Tecklenburg, Lodi, Calif.

15c Each

These are Iris of earlier introduction of which we have built up a sufficient stock to offer at such an attractive price. They are very fine in mass and are excellent varieties to start the Iris planting. After these have bloomed in the beginner's garden the flower lover will wish to add some of the newer originations offered in our general list. Many of the varieties listed here are priced by other growers at from three to five times our figure.

Afterglow. Blend of buff.
Alcazar. S, mauve; F, purple.
Andree Autissier. Pale lilac-blue.
Anne Bullen. Blue and purple.

Duke of York. Very fine blue.
Dulcinea. S, lavender; F, violet-blue.
Ed. Michel. Petunia-violet self.
Halo. S, dark blue; F, violet.
Hesperis. Gray and red-purple.
Hippolyta. Fine lavender-blue.
Jacqueline Guillot. Silvery blue.
Jeannett Dean. Blue-lavender.
Karen. Fine, rich red-purple.
Kestrel. Velvety-violet blend.

Lent Williamson. Lavender-pansy.
Majestic. Bluish-mauve and purple.
Mary Gibson. Beautiful old rose.
Montserrat. Lavender and purple.
Morning Splendor. Dark ruby-crimson.
Mrs. Cuthbertson. Rose and apricot.
Mrs. H. F. Bowles. Brown and red.
Odaroloc. Luminous orchid.
Phyllis Bliss. Rose-lavender self.
Plumed Knight. Pinkish-lilac.
Prospero. Blue and red-purple.
Senorita. Lavender-blue-yellow.
Sir Galahad. Large reddish-mauve.
Sweet Lavender. Violet-purple.
Tenebrae. Rich black-purple.
Tuscany. Blue and red-purple.
Veloute. Deep blue bicolor.
Vincentio. Red-purple bicolor.
W. C. Terry. S, blue; F, purple.
Western Dream. Lavender blue bicolor.
Yeoman. Blue-violet bicolor.
Yolande. Large, beautiful blue.

Collection of 40 varieties, valued at \$6.00, for \$5.00.

Just check varieties desired and tear out sheet. Please include one second choice variety in your order.

"I sent you a trial order last year and your plants were fine—much larger than those of other growers."
—W. H. Kiessig, Davenport, Ia.

PLANTING DIRECTIONS FOR BEARDED IRIS

Prepare the soil to a depth of at least 10 inches, mixing in any commercial non-acid fertilizer such as bone meal, Vigoro, etc. Barnyard manure, if not used too heavily, is satisfactory. Chicken manure is acid and it is best not to use on bearded iris but is fine for the Japanese. Place the rhizome so that the top will be just barely exposed. Keep the ground moist and well stirred to achieve the best results. Iris may be planted from 8 to 18 inches apart, depending on the effect desired and the space to be used. Divide every three or four years, discarding the old parts. July and August planting is advisable, although September and October planting are satisfactory except in those sections having severe winters. Full sunlight is desirable, although they will grow in partial shade.

UTILITY OF IRIS

Iris may be used where other plants will not survive. Their hardiness is amazing. Iris may be made the predominating plant feature, or they may be used as distinct novelty plants. The most pleasing effects can be obtained by massing, but separate clumps of individual varieties are very beautiful.

Iris as a hobby can not be surpassed. Stamp collecting and antiques fail to give the satisfaction and joy that a flower lover may obtain—for an iris collection will lead one across the border and away from life's worries into a wonderland of delight. The thrill of seeing a new variety blooming in your garden can not be equaled.

LENGTH OF BLOOM

By having a few plants of the various species, one may lengthen considerably the season of bloom. The winter blooming *Stylosa* and the *Juno* iris start the blooming season of the new year, followed by the dwarfs, the *Regelias*, the *Pogo-cyclus* hybrids, the *Intermediates*, the *Tall Bearded*, the *Siberian*, the *Spuria*, the *Japanese*, and the *Fall Bloomers*.

ADD NEW VARIETIES

A few varieties added to the garden each season will sustain interest and give added joy to the flower lover. If your garden space is limited, discard your older inferior varieties to make room for the newer superior introductions. You would not think of keeping an obsolete automobile, so why not apply this same good judgment to the flowers in your garden?

PLANTING DIRECTIONS FOR JAPANESE IRIS

Japanese Iris require an acid soil to give the best bloom, although they will grow and bloom in any soil. The proper acidity is obtained by applying a small amount of sulphate of ammonia mixed in the soil in which they are planted. Use no lime. These Iris grow in practically every state, even in Minnesota. Plant either in fall or early spring. Order them at the same time as you order the other types, and we shall send them at the proper time. While they give larger flowers if well watered, the roots should not stand in water during the winter.

PLANTING DIRECTIONS FOR SIBERIAN AND SPURIA IRIS

Same treatment as Japanese.

PLANTING DIRECTIONS FOR ORIENTAL POPPIES

The poppy is a gorgeous flower which grows with little care and blooms profusely over a long period in late spring and early summer. They are invaluable additions to any garden and blend well with other flowers. Plant in August, setting the roots a few inches below the surface and keeping them well watered. Cut down the tops after the blooming season. Any fairly rich, non-acid soil is satisfactory.

For bouquets, cut in early morning or late evening when there is no sun and it is cool. Cut the stems again with a sharp knife and immediately singe the ends over a flame. When placed in water after such treatment, the petals will not fall for four or five days. Some people prefer dipping the ends in boiling water after making the second cut, instead of singeing.

Make out your order on this page which you are to keep to use as a check when your plants are received. On the reverse of this sheet are brief but valuable suggestions for the planting and care of Iris. When you have this order exactly as you want it, copy it on the opposite order blank, filling in your name and address plainly, and mail it to us.

"I received the Iris in fine condition. You surely grow extraordinarily fine plants—the best I ever saw. Any of my friends inquiring about Iris will certainly be referred to you, hereafter."
—Frank Emory, McClellandtown, Pa.

March Blooming

- Stylosa Speciosa** (Unguicularis). This is our blue winter bloomer which sometimes blooms in the late fall, but always blooms in the early spring, often starting as early as February and blooming through March and early April. \$1.00
- Bucharica**. This variety belongs to the Juno group, having a structure like miniature corn plants. The flower is a creamy to yellow bi-color dotted brown. Planting in a hot dry summer position is best. 1.00
- Orchiodes**. A similar Juno iris to the above but bearing flowers of rich deep yellow, two or three to a stem. Both of these irises are striking because of their oddness. 1.50

Collection of three above varieties valued at \$3.50, for \$2.50.

March-April Blooming

DWARF

These miniature gems of the iris garden growing from four to ten inches in height, are adaptable to a wide range of growing conditions, and are especially suitable for borders and for rock gardens. Although the foliage and bloom stalks are short, the flowers are of good size and varieties vary greatly in coloring. They are fine for edging, for use along walks, and may be massed attractively in blankets of color wherever desirable.

- Balceng Curiosity**. 8 in. A yellow variegata with purple falls. \$.25
- Cyanea**. 5 in. A dark black-violet flower with veined throat. .35
- Laddie Boy** (H. P. Sass 1931). 8 in. Velvety purple bi-color with three flowers to a stalk. .30
- Marocain**. 5 in. A rich deep violet-purple and a prolific bloomer. .25
- Mons. Steichen**. A pogo-cyclus dwarf. Flower is pearly white, veined blue. 1.00
- Negus**. 5 in. S, smooth, dark reddish-purple; F, intense velvety black purple, with contrasting rich gold beard. A garden clump is one solid mass of rich color. .25
- Neola** (J. Sass 1932). S, livid violet; F, deep brown shading to molasses brown. This is a new break of color in the dwarf class. It blooms in the fall also. 1.00
- Pixy** (H. Sass 1932). An unusual departure, a dwarf plicata blend, with S yellow, dotted purple and F white, striped and dotted brown and purple. 1.00
- Rose Mist** (H. P. Sass 1932). The beautiful soft mauve pink of this flower is unusual among dwarfs. .50
- Steward**. 6 in. One of the finest light yellow dwarfs. .25
- Socrates**. 8 in. An attractive rich claret wine-red flower. .25
- Titania** (H. P. Sass 1931). Clear deep buttercup yellow. Very good. .50
- Tony** (H. P. Sass 1931). A red-purple, very deep and rich in tone. .50
- Ultra** (H. P. Sass 1929). This pumila hybrid blooms with two and three flowers on a stem, is one of the richest real blue iris. It blooms in the fall also. .35
- Jean Siret**. 9 in. S, clear yellow; F, yellow, striated violet. This variety often blooms in the summer and generally in the fall as well as spring. .75
- Lieut. de Chavagnac**. A pleasing mixture of violet, bronze and cream. It possesses the same blooming characteristics as Jean Siret. .75

Entire collection of sixteen varieties valued at \$8.25, for \$6.

"I received my Iris in fine condition and was a little surprised to find them so, as I had thought the distance too great. But they were just as fresh as if they had been sent in this state."
—Edna J. Riebock, Elgin, Ill.

April Blooming

INTERMEDIATE IRIS

Most of these varieties resulted from crosses between the short dwarfs and the taller bearded species, and as a result are intermediate in height between the two parent species, averaging from 15 to 30 inches. They commence blooming with the late dwarfs and continue blooming into the season of the early tall bearded. The individual flowers are often as large as the later sorts, and recent introductions have advanced this type to a point where they compare favorably with their later blooming cousins. The intermediates are invaluable in the garden to lengthen the blooming season and prevent a gap between the time of the dwarfs and the tall bearded varieties.

Alice Horsefall (H. Sass 1932). Large, velvety, red-purple, orange beard.....	\$1.00
Ambera (H. Sass 1931). An excellent large light amber yellow self.....	.75
Bosniamac . Uniform pale yellow and buff self.....	.25
Carthusian . Clear lavender blue of fine quality. Tall.....	.25
Challenger (J. Sass 1930). This is the largest flowered intermediate. S, fine dark purple; F, flaring rich velvety dark red-violet, with contrasting whitish beard, tipped orange.....	.50
Chief (J. Sass). Slightly darker and shorter than Challenger.....	.25
Cyrus (H. Sass 1931). A late blooming empire yellow self with much deeper splash at the end of the beard, giving a glowing effect. The tallest intermediate, growing as high as 34 inches.....	.50
Don Carlos . S, blue; F, red-purple. A different flower.....	.35
Doxa (H. Sass 1928). A huge flower of novel coloring, the S, being light chalcidony yellow and the F olive buff with blue tint at center. 20 in. tall.....	1.00
Elizabeth Huntington (Syn. Blue Zua). A large deep blue self with petals very crinkled and odd appearing. F, white at base, veined blue, bearing contrasting white beard.....	3.50
Firmament . S, deep chickory-blue; F, darker.....	.25
Helge . Lemon-yellow with pearly shading. Good color blending.....	.25
Ingeborg . Gigantic white with golden veining and beard.....	.25
Kochii . A free-flowering rich deep violet-purple self of good size.....	.25
Nymph (H. Sass 1926). An amazingly free bloomer of empire yellow.....	.25
Primavera . The largest early pure soft yellow self of fine form and texture....	.50
Prince Victor . S, lavender-blue; F, rich velvet-purple.....	.25
Ragusa (H. Sass 1929). The finest rich dark red-purple blend in this group. S, pansy purple; F, blackish red-purple. Five to seven flowers to a 26 in. stalk.....	.50
Sunbeam . A new, clear yellow from England, of vigorous growth.....	.50
Walhalla . S, lavender-blue. F, violet-purple.....	.25
Yellow Hammer . A large, bright amber yellow, sweetly scented.....	.35
Zua . Frosted white, washed with gray. Charmingly ruffled at edges.....	.35
Zwannenburg . A large buff colored Pogo-cyclus hybrid. Very early.....	.25

Entire collection of 23 varieties valued at \$12.55, for \$10.00.

Collection of six valued at \$3.25, for \$2.50.

Chief	Sunbeam
Ingeborg	Walhalla
Kochi	Zwannenburg

"Herewith is my second order for Iris from your garden. I think so highly of your plants that this year I am purchasing from no other grower."
—Glenn Hopper, Fort Wayne, Ind.

April-May Blooming

REGELIA

The Regelias are odd and peculiarly shaped flowers which are native of Turkestan and Armenia. They are more slender, smaller and more delicate than the bearded species. Each stalk bears two or three blooms. This type has a corm-like root rather than a rhizome, and does best when baked by the sun during the summer months.

Hoogiana. An Iris noted for a wonderful smoothness of texture. A very lovely, uniform, bright lavender-blue flower with a conspicuous yellow crest and bright orange beard. One of the very best Irises.....	\$ 1.00
Korolkowi Concolor. Enamel pinkish lilac of unusual tone and texture.....	1.50
Orestes. A regelia-cyclus hybrid with S coppery bronze; F, cinnamon bronzed with crinkly edges.....	2.00
Stolinifera. An exceedingly handsome Iris of elongated form with crinkly brown edges having a blue-violet center and lighted blue beard.....	1.00
Vaga. Large flowers of pale blue lined with bronze and brown.....	1.50

Entire collection of five varieties above, valued at \$7, for \$5.

POGO-CYCLUS

These hybrid varieties have resulted from crossing the Pogoniris (bearded species) with the Oncocyclus species (a large flowered species found in Asia Minor, but not hardy in cold climates). These varieties are hardy and easily grown. They are outstanding because of their distinctive color and character, differing greatly from the bearded iris. Care and treatment is the same as required for the bearded species.

Carmelo. An unusual shaped flower of peculiar note of blue.....	.25
Dilkush. S, heavily veined violet; F, deep reddish-purple with black throat blotch. Fine large rounded flowers.....	.75
Flecta. A fine flower with lavender S, veined a deeper shade; F, veined and dotted reddish-brown on a creamy-gray ground. Golden beard.....	1.00
Hamadan. Upright open ruffled S of uniform rich violet and flaring F the same color, with a white throat overlaid with purple veins. Styles are rich metallic bronze. A fine variety.....	.50
Ib-Pall. A fine free flowering variety, with ruffled reddish-lilac S and dark violet F over a white ground. Bronzy-yellow beard, with a dark spot on the falls at the tip of beard.....	.50
Lady Lilford. S, purple-violet; F, black-purple with a black beard. A large flower of curious form on tall stems. Very hardy.....	1.00
Mons. Steichen. A semi-dwarf variety of pearly white, veined blue and russet.	1.00
Shushan. S, bright violet-purple; F, velvety dark mahogany, with burnt-orange beard and bronze throat.....	1.00
William Mohr. The ground color is pale lilac, S flushed darker. The entire flower is beautifully veined manganese-violet.....	1.50
Zwannenburg. A very large flowered variety, a prodigious bloomer and one of the most rugged of all Iris. S, cream flushed and lightly blotched pale violet and of silky texture. F, smooth velvety old gold splashed maroon. Lemon-yellow crests and bright orange beard. First to bloom.....	.25

Entire collection of ten varieties valued at \$7.75, for \$6.

"I must comment on your plants. They are the largest and finest I have ever seen."

—W. I. Coddington, Martinsville, N. J.

"Practically every plant bloomed despite the late planting." —Mary E. Thomas, Wichita, Kan.

SIBERIAN IRIS

Emperor

Snow Queen

Butterfly

"My order of beardless iris has just arrived. I have never received such fine roots from any other grower."

—E. V. D. Ferguson, Hempstead, N. Y.

May and June Blooming

IRIS SIBERICA

The Iris of this group have tall stems and grass-like foliage. They are among the best for cutting or for massing by the waterside. The flowers are various shades of blue, with white or yellow markings, and pure white. The plants do best in a moist location, but are easily grown in any soil, no matter how dry. The flowers grow on long tubular stems, among narrow ornamental grass-like foliage. Varieties vary in height from 30 to 50 inches, an established clump bearing as many as forty to fifty blooms.

Blue Flame. The lightest blue Siberian and very striking.....	\$1.00
Blue Heron. A large, wide-petaled flower of brilliant blue.....	.75
Blue Owl. An exquisite rich blue with bronze and white throat.....	.75
Blue Star. A large, deep rich violet. The stigmas are large and drooping, giving the flower the appearance of a six-pointed star.....	1.00
Butterfly. The standards and styles are a soft uniform sky-blue.....	.50
Caesar. A new large dark blue-purple of outstanding merit.....	1.50
Emperor. The finest of the real dark Siberians. Very tall.....	.60
Mrs. Sanders. A fine rich brilliant violet-blue of fine form.....	.50
Periwinkle. Larger, taller and darker than Perry's Blue. Fine.....	1.00
Perry's Blue. Beautiful bright sky-blue. Lovely and unusual.....	.50
Sanguinea. Intensely brilliant blue flower. Medium height.....	.25
Silver Tip. Dark, clear blue with very light stigmas. Very distinct.....	1.00
Skylark. A soft light blue flower.....	.60
Snow Queen. Pure glistening white with yellow throat. Medium height.....	.40
Sunnybrook. An exquisite shade of soft Alice blue of fine substance.....	.50
True Blue. A fine, beautiful pure blue tinged with yellow on falls.....	.50

Entire collection of sixteen varieties valued at \$11.35, for \$9.

IRIS SPURIA

These Iris grow in clumps four to five feet high, the flowers somewhat resembling but larger than the Dutch Iris are borne on a tall stiff stem, well above the blade-like foliage. They do well in any soil, but will thrive in a wet soil in which the Tall Bearded Iris will not grow. This species is rapidly increasing in popularity. The flowers are very heavily substanced, and grow as high as five feet.

Aurea. A fine, uniform rich golden yellow ranked among the best.....	\$0.50
Monnieri. A fine, large yellow, similar to but lighter than Aurea.....	.60
Mrs. Tait. A soft porcelain blue of varying shades.....	.50
Notha. S, rich violet; F, blue, spotted yellow—an attractive combination.....	.35
Ochroleuca. White, with orange blotch on falls. One of the best of the Spurias and should have a place in every garden.....	.35

Collection of five valued at \$2.30, for \$1.75.

MISCELLANEOUS IRIS

Dorothea Williamson. An American hybrid of a royal purple. Entirely different from others and fine for table bouquets.....	\$.40
Fulvala. Similar to D. Williamson but more copper in tone. Very fine.....	.60
Pseudacorus Gigantea. An improved form and much larger than the common Pseudacorus, known as the "Yellow Water Iris." The flowers are of pure yellow, the plants growing in marsh or swampy land, in water, or in dry soil. Try this in your pool or along its edges.....	.35
Tenax. Native Oregon beardless iris. Remarkably pleasing and graceful. Flowers borne on 12 to 15 inch stems, vary from deep rich red-purple through mauve and lavender to palest pearl grey.....	.25

"I feel that I must write and tell you how delighted I was to get the Iris rhizomes as they were the most enormous rhizomes I have ever seen." —Mrs. George A. Tower, Richmond, Va.

May and June Blooming

ORIENTAL POPPIES

Few flower lovers realize the great variation of color and form and the long length of the blooming season afforded by the poppy family. No other flower can compare with it in the ease of culture and the number of blooms produced from the little effort expended. Of the many poppy species, *P. orientale* is the long-lived perennial type which is becoming so popular because of its hardiness, its freedom from disease, and its ease of culture. The gigantic flowers reach a diameter of ten inches and more and vary in color from salmon to pink, red to orange, and mulberry to white.

The Oriental poppy has a blooming season of from six to seven weeks, producing occasional intermittent flowers throughout the summer and early fall. The plants are prodigious bloomers, even a young clump bearing as many as six or more flowers, while an older established plant will bear a dozen and more. These flowers combine in happy association with others of their season, especially with the iris, and add a desired bit of striking color to the garden picture.

Plant in summer and early fall.

Bracteatum. 28 in. tall. Bears bracts. 6 orange-red petals, 4½x3 with medium blotch. Diameter across top of flower, 4 in.....	\$.50
Brightness. 35 in. Rich, glowing salmon petals, 4x3, with medium blotch. Diameter 5 in.75
Cavalier. 35 in. Beautiful glowing cerise petals, 5½x4¾, with narrow blotch. Large center. Diameter 5 in.....	5.00
Duke of Teck. 33 in. Light crimson petals, 4x3, on strong stems.....	1.00
Edna Perry. 30 in. Medium pink petals, 4½x4, with medium blotch. Diameter 4 inches50
Enchantress. Soft lilac-rose colored petals of exquisite beauty.....	7.50
Excellent Pink (name lost). 28 in. Dark pink petals, 6x4, with large blotch, big center; early. Diameter 3½ in.....	1.00
Enfield Beauty. Bright, rich salmon, maroon at base. Late.....	1.00
Gerald Perry. 33 in. Dark apricot pink petals, 5x3½, with small blotch. Diameter 5 inches.....	.75
Goldschmidt. 26 in. Orange-scarlet petals, 3½x3, with very small blotch. Diameter 3 inches.....	.75
Goliath. 27 in. Light orange petals, 5x3½, with medium blotch. Diameter 6 in..	.60
Grand Mogul. 26 in. Deep orange-red, petals 3½x2¾ with medium blotch. Diameter 3 in.....	.50
Henri Cayeux. 28 in. Unusual and lovely coloring. Old rose shading into burgundy, petals 3x2½, with small blotch, four petaled. Diameter 3 in.....	1.50
Hercules. 36 in. Flame colored red, petals 6x5, with medium blotch. Diameter 6 in. Four petaled.....	1.00
Joyce. Cerise and old rose.....	.50
Lord Lambourne. 35 in. Deeply fringed rich orange, petals 5½x4, with large blotch and medium center. The flower is odd because the petals are cut as though with scissors. Diameter 4½ in.....	.50
Lulu Neeley. Prolific, wonderfully free bloomer with large flowers of a deep red. Pronounced by many as the world's finest poppy.....	1.50

"I wish to state I was more than pleased with the Iris you sent me. They were wonderfully large and healthy plants."
 —Mrs. J. E. Mack, San Bernardino, Calif.

Mandarin. 30 in. Real Chinese red. Diameter 8 in.....	1.50
Mahony (Mahogany). Tulip shaped flowers of deep, red mahogany-maroon.....	.50
May Sadler. 35 in. Peculiar salmon pink, petals 5½x4 with large blotch. Diameter 5 inches.....	.75
Menelik. 25 in. Dark orange, petals 4½x3½. Diameter 4½ in.....	.75
Mrs. Perry. 34 in. Lovely shade of salmon pink.....	.50
Negrillon. 30 in. New and distinct shade of carmine, petals 3½x2½. Diameter 3 inches	1.50
Olympia. 29 in. This is the very early, odd, and beautiful double poppy, each flower being composed of from 20 to 50 orange or flame scarlet colored petals 3x2½, with no blotch. Diameter 5 in.....	.50
Orange Giant. 35 in. Large rich orange, petals 4x3 with medium blotch. Diameter 4 inches.....	.25
Perry's White. 29 in. Pure satiny white, petals 4x3 with black-maroon blotch at base. Diameter 4 in.....	1.00
Pink Beauty. 26 in. Early pure pink, petals 3½x2½, with small blotch. Diameter 4 inches.....	.50
Princess Ena. 35 in. Good salmon-pink, petals 3¼x2½ with small blotch. Diameter 4 inches.....	.50
Princess Victoria Louise. 24 in. Soft salmon rose, petals 3½x2½, with medium maroon blotch. Diameter 3½ in.....	.50
Proserpine. 45 in. Chinese red with huge built-up center; petals 5x4 with large blotch. Diameter 4½ in.....	1.25
Pygmaea. 29 in. Orange shaded scarlet; petals 3x2. Late. Diameter 3 in.....	.75
Queen Alexandra. 24 in. Pure light pink; petals 4x3 with medium maroon blotch. Diameter 3½ in.....	.50
Royal Scarlet. 42 in. Bright oxblood-scarlet; petals 4x3½ with medium blotch. Early. Diameter 6 in.....	.50
Salmon King. 32 in. Between salmon and scarlet; petals 5x3. Four petaled. Diameter 3 in.50
Trilby. 36 in. Dark, lustrous pinkish-red; petals 5½x4. Diameter 5 in.....	1.50
Welcome. Deep scarlet, shaggy, with dusty black center.....	1.50
Wurtembergia. 37 in. Bright red petals like pieces of silk, 4½x4, with medium blotch. Big built-up center of stamens. One of the very finest of poppies. Diameter 5 in.....	1.00

Entire collection of 37 varieties valued at \$41.10, for \$30.00.

Collection of seven, valued at \$4.25, for \$3.00.

Lulu Neeley	Lord Lambourne

"I want to thank you for the fine plants you sent on my order. They certainly arrived in A-1 condition."
—E. H. Sibley, Wethersfield, Conn.

JAPANESE IRIS

Kumono

Kuro Kumo

Kombarin

"Your fine plants came just as fresh as Iris I have purchased within fifty miles of home."
—Mrs. Frank Wheeler, Greenville, Illinois.

June-July Blooming

JAPANESE IRIS

These remarkable Iris are now coming into great popularity as their merits are becoming better known. They bloom after the Bearded Iris and continue blooming for fully six weeks. The single varieties have three petals and the double varieties six.

Japanese Iris require an acid soil to give the best bloom, although they will bloom in any soil. The proper acidity is obtained by applying a small amount of sulphate of ammonia to the soil in which they are planted—a handful to each plant, applied once a year. Use no lime. These Iris grow in practically every state, even in Minnesota. In a few places where they have not succeeded, their failure may be attributed to being planted too late in autumn and thus being heaved out by the frost. Plant either in the fall or early spring. When they are ordered with Bearded Iris, we hold this part of the order until the proper time for planting. While they give larger flowers if well watered, the roots should not stand in water during the winter.

It is to be regretted that most dealers sell "mixed" varieties, this term being used to designate seedlings of unknown value—not one per cent of which are worth planting. We have been perfecting our list of varieties for a number of years and have what we believe to be the best collection of named varieties in this country, if not in the world. We contributed nearly a hundred varieties to the Brooklyn Botanical Test Garden some years ago. Many of these varieties have been returned to us with the names which the Garden recognizes. We desire to have our Japanese Iris as correctly named as our other varieties. When other dealers are as particular, this class will become as popular as the Bearded Iris.

Angel's Den. Dbl. Fine flower of vinous-purple and a good seller.....	\$.50
Ayasi. Sgl. White center with wide crimson edge. An attractive Iris.....	.50
Carlton Childs. Sgl. Ivory-white, veined plum with pinkish standards.....	.50

FLOWER ARTICLES

For those of our readers who wish additional information upon the growing of Iris and Oriental poppies, we recommend the following magazine articles written by Howard Weed, recognized iris authority and member of our firm:

"The Poppy as a Garden Flower," House Beautiful, June, 1932.

"Four Famous Hybridizers of Iris," Flower Grower, May, 1933.

"The Iris—A Fitting National Flower," Flower Grower, June, 1933.

"Favorite Iris—And Why," Horticulture, June 1, 1933.

"You Can Have Iris the Year Round in Sunset Land," Sunset, May, 1933.

"The Iris—Past, Present and Future," Flower Grower, July, 1932.

"Interesting and Rare Iris Types," Flower Grower, May, 1932.

(The above article was condensed and re-printed in Garden Digest, July, 1932.)

"Iris Species of the Future—Part 1," Western Homes and Gardens, May, 1931.

"Iris Species of the Future—Part 2," Western Homes and Gardens, June, 1931.

"Outstanding Iris," House and Garden, July, 1931.

"Superior Iris of Today," House Beautiful, July, 1931.

An article describing a visit to our gardens appeared in Better Homes and Gardens, May, 1932.
